WOMA puts great emphasis on environmentally friendly products. In the KÄN 050.032 you find a list of prohibited and declarable substances, which may not be included respectively must be declared in products, materials and resources which are delivered to WOMA.

## Confirmation / Declaration:

We confirm that we have taken note of the Kärcher standard KÄN 050.032 and that the materials and products supplied to you or to third parties appointed by you do not contain substances which are prohibited or to be declared by the Kärcher standard KÄN 050.032, their marketing is prohibited to the current legislation and to the legislation being valid at the date of delivery.

Our products supplied to you or to third parties appointed by you particularly contain none of the substances that are prohibited by the EU directive 2002/95/EG (ROHS) and 2011/65/EU (ROHS2) (data related to homogeneous material, substances see Kärcher standard 050.032\*) and no substances mentioned on REACH candidate list in a concentration > 0,1% – substances see [http://echa.europa.eu/chem\\_data/candidate\\_list\\_table\\_en.asp](http://echa.europa.eu/chem_data/candidate_list_table_en.asp). It was not made advantage of any ROHS exceptions.

This applies to all products, except the following declared ones:

| Product | Woma-item number | Substance | Concentration | Drawing specification** | Proposals substitute substance (please specify 2-3) | until | ROHS exception No. |
|---------|------------------|-----------|---------------|-------------------------|---|-------|--------------------|
|         |                  |           |               |                         |   |       |                    |
|         |                  |           |               |                         |   |       |                    |
|         |                  |           |               |                         |   |       |                    |
|         |                  |           |               |                         |   |       |                    |
|         |                  |           |               |                         |   |       |                    |

If more than 5 item numbers are affected, please ask for a list of the parts supplied by you at the purchasing department responsible for you.

Given examples for declaration of substances:

| Product   | Woma-item number | Substance                         | Concentration | Drawing specification** | Proposals substitute substance (please specify 2-3) | until    | ROHS exception No. |
|-----------|------------------|-----------------------------------|---------------|-------------------------|---|----------|--------------------|
| example 1 | 6.401-223.0      | ChromiumVI (corrosion protection) | >0,1 weight-% | yes                     | Zinc lamellae lamination                            | 1.1.2005 |                    |
| example 2 | 6.403-252.0      | lead                              | 0,4 weight -% | no                      | -   | 1.6.20XX | app.III/6c         |
| example 3 | 6.405-296.0      | DEHP                              | 24%           | no                      | DINP, DINCH   | 1.1.20XX |                    |
